SEVERE WEATHER HAZARD REPORT

Springfield-Greene County Office of Emergency Management

Emergency Operations Center Partner Agencies

12/04/2017 –1330

Watches/Warnings:

No watches or warnings at this time

Hazards

12/04/2017

Damaging Winds	<i>Limited</i>
Hail	<i>Limited</i>
Lightning	<i>Limited</i>
Tornado	<i>Limited</i>
Fire Weather	<i>Limited</i>

Discussion:

Strong to severe thunderstorms will develop this afternoon and evening as a cold front moves across the region. Thunderstorms with wind gusts to 70 mph, hail up to a quarter size and isolated tornadoes will be possible late this afternoon and evening. Overall threat for severe storms will be highest from 5pm to 9pm in yellow shaded areas. The tornado risk remains low, but not zero.

Long Term:

Increasing winds and drier air behind the front will lead to an elevated fire weather risk from Tuesday through Thursday. Wind chills in the single digits will be possible by the end of this week.

Citizen Action Statement:

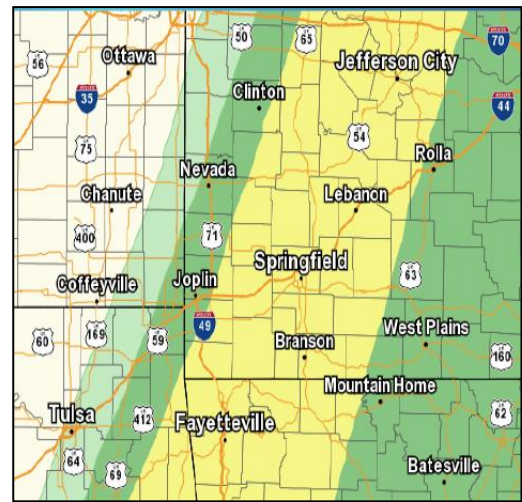

Citizens should consider the following guidance:

- Citizens with outdoor recreational plans along area rivers and streams should be alert for the potential for lightning strikes and rapidly rising water levels. *“Turn around...don’t drown!”*
- Have a severe weather shelter plan! Don’t wait until severe weather is imminent to figure out where to shelter.
- Have a way of receiving severe weather warnings (NOAA Weather Radio, social media, news media, etc.)
- Take shelter when lightning is in the area! *“When thunder roars...go indoors!”*

Emergency Management Issues:

- All interested parties should continue to monitor the situation for continuing forecast changes
- The OEM will be monitoring "WxNet" (B-15) on Greene County 800 TRS
- Follow OEM: Twitter @gcoem or Facebook/SpringfieldGreeneOEM
