# SEVERE WEATHER ALERT

stay aware, be prepared...

## SEVERE WEATHER HAZARD REPORT

Springfield-Greene County  
Office of Emergency Management

### Emergency Operations Center Partner Agencies

5/19/2018-1030

### Watches/Warnings:

No watches or warnings at this time

### Hazards:

Hail	Limited
Wind Gusts	Limited
Severe Thunderstorms	Limited
Lightning	Limited

### Discussion:

Isolated showers and thunderstorms will be possible at various times throughout the day. Some of these storms will have the potential to become severe with large hail up to the size of half dollars and damaging winds in excess of 60 MPH with the best chance north of I-44. More storms will move in later this evening into the overnight hours. Additionally, there is uncertainty with how the storms will develop. Increased weather monitoring is advised.

### Long Term:

Additional thunderstorms are possible on Sunday. A few storms may become severe across central Missouri if enough instability develops.

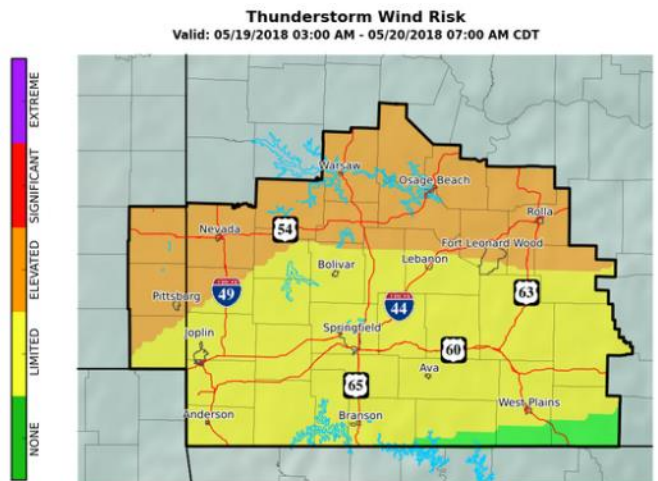

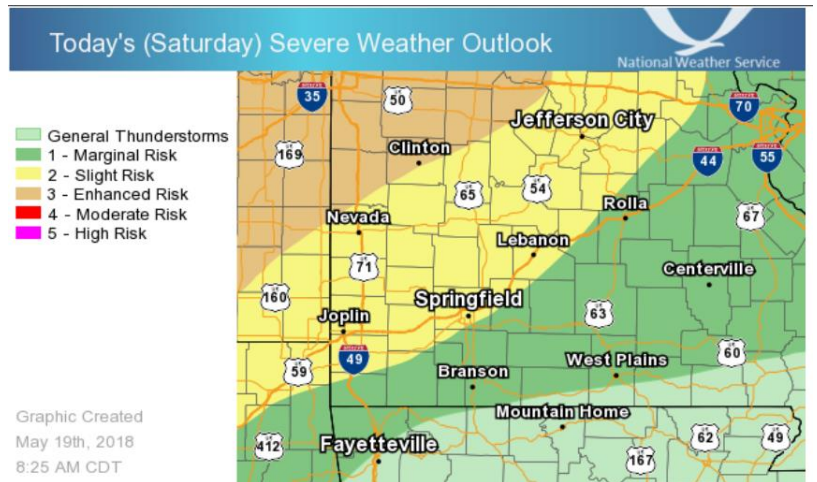

### Citizen Action Statement:

Citizens should consider the following guidance:

- Citizens with outdoor recreational plans along area rivers and streams should be alert for the potential for lightning strikes and rapidly rising water levels. *"Turn around...don't drown!"*
- Have a severe weather shelter plan! Don't wait until severe weather is imminent to figure out where to shelter.
- Have a way of receiving severe weather warnings (NOAA Weather Radio, social media, news media, etc.)
- Take shelter when lightning is in the area! *"When thunder roars...go indoors!"*

### Emergency Management Issues:

- All interested parties should continue to monitor the situation for continuing forecast changes
- The OEM will be monitoring "WxNet" (B-15) on Greene County 800 TRS
