Discussion:

Golf ball sized hail, damaging winds, and tornadoes are possible again today as a cold front moves through the region. Moderate to heavy rainfall will lead to additional flash flooding tonight, especially in already saturated areas. **Spotter activation may be needed in the next 6 hours.**

Confidence Level: Moderate to high confidence in severe weather and flooding potential.

Citizen Action Statement:

- Have a severe weather shelter plan! Review emergency kit and identify closest safe shelter.
- Have a way of receiving severe weather warnings (NOAA Weather Radio, social media, news media, etc.)
- Take shelter when lightning is in the area! *“When thunder roars...go indoors!”*
- Citizens with outdoor recreational plans along area rivers and streams should be alert for the potential for lightning strikes and rapidly rising water levels. *“Turn around...don't drown!”*

Emergency Management Issues:

- Springfield-Greene County EOC is currently at **OpCon Level 3: Monitoring**
- OEM is monitoring "WxNet" (B-15) on Greene County 800 TRS
- All interested parties should continue to monitor the situation for forecast changes.
- Follow OEM: Twitter @gcoem or Facebook/SpringfieldGreeneOEM
