## SEVERE WEATHER HAZARD REPORT

### Springfield-Greene County Office of Emergency Management

**Emergency Operations Center Partner Agencies**  
06/01/2019 – 1650

**Watches/Warnings:** *No Watches or Warnings in effect.*

<b>Hazards:</b>	<b>6/1</b>
Severe Storms	<i>Elevated</i>
Lightning	<i>Limited</i>
Tornado	<i>Limited</i>
Hail	<i>Elevated</i>
Wind Gusts	<i>Elevated</i>

### Discussion:

Scattered storms are expected with a front that will move south into the area. Stronger instability and vertical wind shear will support a few strong to severe storms this afternoon and evening, especially north of I-44 and east of US 65. Frequent cloud to ground lightning, locally heavy rainfall with localized flash flooding, large hail up to 2 inches, and wind gusts of 60 mph are possible. This activity will weaken toward midnight as it shifts south and east of the area. **Storm Mode:** Discrete supercells evolving into clusters as storms push southeast through the area. **Spotter Activation:** May be needed later today. **Timing:** Exact timing is in question.

**Confidence Level: GOOD for severe weather.**

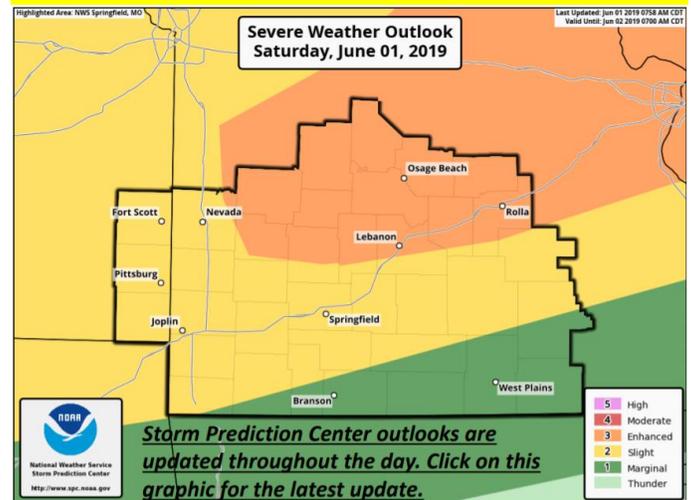

### Citizen Action Statement:

- Have a severe weather shelter plan! Review emergency kit and identify closest safe shelter.
- Have a way of receiving severe weather warnings (NOAA Weather Radio, social media, news media, etc.)
- Take shelter when lightning is in the area! *"When thunder roars...go indoors!"*
- Citizens with outdoor recreational plans along area rivers and streams should be alert for the potential for lightning strikes and rapidly rising water levels. *"Turn around...don't drown!"*

### Emergency Management Issues:

- Springfield-Greene County EOC is currently at **OpCon Level 3: Monitoring**
- OEM is monitoring "WxNet" (B-15) on Greene County 800 TRS
- All interested parties should continue to monitor the situation for forecast changes.
