HAZARD	July 20	July 21	July 22
Excessive Heat	Elevated	Elevated	Elevated
Fire Weather	Limited	None	Limited

DISCUSSION

Afternoon temperatures will warm back into the mid-90s with heat index values in the 100 to 109 degree range. A few thunderstorms may make it into central Missouri tonight. If they do, the stronger storms would be capable of damaging wind gusts up to 60 mph. Most of the thunderstorm activity, however, should remain north of the area, days two through seven, Monday through Saturday. The excessive heat will continue Monday through the end of next week with highs generally in the mid-90s and heat index values from 100 to 110 each day.

CITIZEN ACTION STATEMENT

- **Drink plenty of water:** Water, sports drinks, and electrolyte solutions can help replace lost fluids and electrolytes.
- **Avoid alcohol and caffeine:** These can dehydrate you further.
- **Wear light clothing:** Choose lightweight, light-colored, and loose-fitting clothing to help your body stay cool.
- **Limit outdoor activity:** Avoid strenuous activities during the hottest part of the day, typically between 10 AM and 4 PM.
- **Never leave children or pets in cars:** Temperatures inside a parked car can rise dangerously and quickly.
- **Know the signs of heat illness:** Heavy sweating, muscle cramps, nausea, dizziness, and headaches to name a few.

"Dress light and hydrate!"
