DISCUSSION

A flood watch has been issued for the area with the potential of locally heavy rainfall and flash flooding this afternoon through Friday morning. Widespread rainfall amounts of 1-2 inches with localized bands of up to 4 inches of rain are expected, with the heaviest rainfall likely occurring this afternoon through Friday morning. Efficient rainfall rates of 1-2 inches per hour with repeated thunderstorms occurring over the same area may cause rainfall totals to vary spatially more than predicted.

CITIZEN ACTION STATEMENT

- Have a severe weather shelter plan. Review your emergency kit and identify the closest safe shelter.
- Have a way of receiving severe weather warnings (NOAA Weather Radio, social media, news media, etc.)
- Take shelter when lightning is in the area.
- **"When thunder roars . . . go indoors!"**
- Citizens with outdoor recreational plans along rivers and streams should be alert for the potential for lightning strikes and rapidly rising water levels.

"Turn around . . . don't drown!"
